Bright Akwasi Kodua

Computer Science Graduate · Software Development, IT & Cybersecurity

PROFILE

Computer Science graduate from the University of Cape Coast with hands-on experience in full-stack web development, cybersecurity, systems administration and networking. Built and deployed a live ecommerce platform, completed a cybersecurity internship, and combines technical skills with real customer-facing and teaching experience. Seeking a National Service placement to contribute from day one and keep growing as a technology professional.

EDUCATION

BSc. Computer Science, University of Cape Coast (UCC) — Completed · Ceremony Nov 2026
Software Engineering · Database Management · Cryptography & Network Security · Networking (VLSM, VLANs, IPsec VPN, WPA3) · Systems Administration (BCP/DRP, backups, Unix user management) · Operations Research (Simplex, Hungarian algorithm)

Okomfo Anokye Senior High School, General Science — 2018 – 2021

Kent State University, Kent, Ohio, USA — Offer of admission · Deferred

TECHNICAL SKILLS

Programming & Web	Python, JavaScript, Java, C++, Node.js, React, Express; intermediate app development
Databases	PostgreSQL, Supabase, SQL
Cybersecurity	Vulnerability scanning, file integrity monitoring, phishing detection, network security design, Kali Linux
Systems & Networking	Unix/Linux administration, VLANs, VPN configuration, network troubleshooting, hardware diagnostics and repair
Design & Tools	Adobe Photoshop, Microsoft Office, Git, GitHub, ticketing/monitoring basics

PROJECTS

Fexiwalt: Ecommerce & Classifieds Marketplace — fexiwalt.com
Built and deployed a live marketplace for Ghana (phones, vehicles, property, fashion and more) with category browsing, deal listings and WhatsApp-based seller contact, delivered as a mobile-first installable web app.

Agoloso Motors: Full-Stack Car Dealership Platform — Node.js · Express · PostgreSQL · Supabase
Built and deployed end to end: customer site with car search, test-drive bookings and finance applications, plus an admin dashboard with role-based access. Independently managed backend setup, environment configuration and database migrations.

Phishing URL Detection System (Dissertation) — Python · Flask · Machine Learning
Building a system that uses machine learning to detect phishing URLs in real time, combining web development with applied security.

SmartPay Solutions: Network Infrastructure Design — Class project
Network security architecture for a fintech scenario: VLANs, IPsec VPN, WPA3 security and incident response planning.

Security Tools: File Integrity Monitor & Network Port Scanner — Python
Built from scratch to detect unauthorised file changes and scan networks for open ports and vulnerabilities.

Hardware Diagnostics & Repair — HP EliteBook 745 G5
Diagnosed and resolved a display cable fault through hands-on troubleshooting.

EXPERIENCE

Customer Service Support — Family-owned second-hand business

Front-line customer service: assisted buyers, answered enquiries and helped resolve issues to keep customers satisfied and returning.

Mobile Money Vendor — Kumasi, Ghana

Managed daily transactions, customer service and cash reconciliation with reliability and attention to detail under pressure.

Teacher

Delivered structured lessons and managed classroom operations, building strong communication and organisational skills.

CERTIFICATIONS, TRAINING & ACTIVITIES

- Cybersecurity Internship Certificate, Thrive Ghana · Microsoft Office Course, Alison (completed) · DIVE+ Programme: From National Service to Career-Ready, British Council (in progress)
- Participant, NestCon Capture-the-Flag (solved web security challenges including SSRF and SSTI) · Participant, Cursor+ Hackathon

LANGUAGES

English (fluent) · Twi (native) · Ga
